CAREER OBJECTIVE

Motivated and Aspiring AI and Data Science student with a strong foundation in Python, Machine Learning, and Full Stack Development, seeking an IT placement role to apply analytical and problem-solving skills in developing innovative solutions. Passionate about leveraging AI, web technologies, and data-driven insights to drive impactful projects and contribute effectively to a forward-thinking organization.

EDUCATION

G. H. Rasoni College of Engineering, Nagpur
B.Tech. in Artificial Intelligence

September 2023 – May 2026

Government Polytechnic, Bramhpuri
Diploma in Computer Technology

December 2020 – May 2023

EXPERIENCE (Internships)

Green Skills using AI Technologies

Edunet Foundation – Remote | April 2025 – April 2025

Skills: Python, SQL, Functional Testing, Agile, Machine Learning, Power BI, HTML/CSS

- Designed an AI-driven prototype for sustainability using data modeling and dashboarding
- Collaborated with mentor on model selection, milestone reviews, and project presentations
- Achieved certifications from Shell, AICTE, and Edunet in AI & Green Skills

AI Intern

VOIS – Remote | Oct 2023 – Nov 2023

Skills: Python, SQL, Functional Testing, Agile, Machine Learning, Power BI, HTML/CSS

- Created frontend dashboards and visualizations for AI behaviour reports
- Collaborated in Agile teams to deliver sprint-based functionality
- Practiced unit testing and debugging on Python-based tools

Python Developer Intern

iBase Electrosoft LLP, Nagpur | Jul 2022 – Aug 2022

Skills: Python, SQL, PHP, JavaScript, MySQL, Shell Scripting, Unit Testing

- Worked on web interfaces using HTML, CSS, JavaScript, and backend integration in Python
- Handled SQL queries and data rendering for dashboards
- Wrote reusable functions and performed testing across modules

PROJECT

FarmCare AI – Smart Farming Assistance Platform

Tech Stack: Python, TensorFlow/Keras, OpenCV, Flask, HTML, CSS, JavaScript, MySQL

- Built a crop recommendation system that suggests the most suitable crop based on soil nutrients, pH, and environmental factors.
- Developed a disease detection module using image classification (CNNs) to identify plant diseases from leaf images.
- Integrated ML models into a Flask-based web app with interactive frontend for farmers.

Malware Classification Using Machine Learning

Tech Stack: HTML, CSS, JavaScript, Django, SQL

- Developed a responsive web-based disease predictor with frontend built using HTML/CSS/JS
- Integrated backend ML model through Django and visualized outputs in a clean UI
- Applied form validation and error handling for smooth user experience

Disease Prediction Web App

Tech Stack: Django, Python, ML, SQL

- Developed a web-based prediction system using Django and integrated trained ML model.
- Created MySQL database schema for user inputs and prediction logs.
- Implemented Front-End Validation and full testing flow for reliability.

KEY SKILLS

Languages & Web Technologies: JavaScript, HTML, CSS, Python, Java.

Database: SQL, MySQL.

Data Science & AI/ML: Pandas, NumPy, Scikit-Learn, TensorFlow, NLP, Data Analysis

Frameworks & Tools: React.js, Django, GitHub, Visual Studio Code, Figma (Basics)

Concepts: Responsive Design, UX Patterns, Agile, Scrum, OOP, Design Patterns (Basics), DSA

Cloud: Amazon Web Services (AWS – Basic)

Soft Skills: Requirement Analysis, Problem Solving, Team Collaboration, Communication, Adaptability

CERTIFICATION

- AWS Cloud Practitioner Essentials
- Oracle Cloud Infrastructure | Oracle
- AWS Educate Introduction to Generative AI | Amazon Web Services
- Web Development Fundamentals | IBM

ACHIEVEMENTS

Technical Volunteer at AI Odyssey, Nagpur

Assisted in organizing and managing technical sessions and live demos during the AI Odyssey event, supporting over 100 participants with real-time problem-solving and event coordination.

Volunteer at Art of Living Foundation

Actively contributed to community well-being initiatives, including organizing youth sessions and workshops focused on stress management, leadership, and mindfulness
